TECHSPANSION RELEASES VISUALHUB 1.26

iPhone support for local and EDGE playback!

Techspanion's VisualHub has been a runaway hit with Mac users of all types, from students to video professionals to families and everyone inbetween. Even you.

VisualHub 1.x makes its swan song release with full iPhone video support. Presets matched specifically to the iPhone's high-quality screen, as well as special "EDGE" and "Tiny" presets meant for playback over AT&T's EDGE network. These videos support the iPhone's FastStart and random-access video playback features.

VisualHub 1.24 is only \$23.32 and is a free upgrade to registered customers...although they are certainly welcome to buy more copies if they'd like.
