## TECHSPANSION RELEASES VISUALHUB 1.28

### Support for the new iPod touch!

Techspanion's VisualHub has been a runaway hit with Mac users from all over the world, from Andorra to Zambia. Video conversion has never been so easy.

Following the surprise early release of the iPod touch, Techspanion matches it with the quick release of VisualHub 1.28 with full iPod touch compatibility!

Specialized presets are available for each iPod model, with a universal preset designed to be compatible with all Apple video devices at the highest quality possible.

VisualHub 1.28 is only \$23.32 and is a free upgrade to registered customers...although they are certainly welcome to buy more copies if they'd like.
